

Éter Anima

Soma Fungi

The intelligent trainer for your body's defenses.

Discover the art of modulating, balancing, and recharging your biological strength daily.

“

Your defenses don't need to be artificially forced.

They need to be trained to act with precision.

”

THE SOMA FUNGI PHILOSOPHY

Forcing the immune system to react by brute force only drains your energy.
Soma Fungi acts as a protective guide that calibrates and educates your natural defenses from their root.

The defense wear-down loop

1. Stress blockage

Daily tension and fatigue activate alert hormones that temporarily numb your protective surveillance cells.

2. False alarms

An unbalanced gut lets impurities pass into the body, making your defense system work overtime unnecessarily.

3. Total exhaustion

Having lost its natural compass, the body tires and becomes vulnerable to weather changes and continuous strain.

Two ways to care for your protection

The Common Stimulant

Uses isolated synthetic vitamins that force your defenses to speed up artificially. This drains your energy reserves and can cause uncomfortable inflammation.

The Soma Fungi Intelligence

Delivers a blend of adaptogenic mushrooms and friendly bacteria that train your protective cells to act with surgical precision, without overloading.

Pillar 1: Upgrading your defenses

A living instruction manual

Reishi and Shiitake (180mg each) don't blindly accelerate your defenses. They work by educating your internal soldiers to distinguish real threats.

Nature's wisdom

Harnesses the power of mycelium to create an intelligent cellular network that balances your immunity and prevents it from overreacting.

Pillar 2: Battery and cellular strength

Cordyceps Sinensis (290 mg)

Having a well-trained army of defenses is useless if it lacks the energy to act.

Cordyceps directly recharges your body's cellular batteries (ATP), maximizing vitality and oxygen. This way, your protective system stays strong against fatigue and seasonal changes.

Pillar 3: Your castle's wall

The origin of your shield (80%)

The vast majority of your defenses are born and trained in the intestine. If the intestinal walls have cracks, your overall health suffers.

The synergy of Lion's Mane and Probiotic

Lion's Mane (180mg) works by sealing and repairing the cracks in the intestinal wall, while the MLB1 Probiotic (10^{10} CFU) plants a garden of allied bacteria that block invaders.

Crossing the stomach intact

100%

The natural armored package

Many lab-made supplements and vitamins break down and lose their potency when they come into contact with stomach acids.

Soma Fungi's biological matrix protects the active ingredients as if it were an armored package, safely guiding them to the deep intestine (Peyer's Patches) to ensure your body absorbs every milligram of intelligent nutrition.

The difference from the ordinary

Cellular benefit	Common defense supplement	SOMA FUNGI (Éter Ánima)
Type of action	Artificial and forced stimulation	Biological modulation and education
Base ingredients	Isolated synthetic vitamins or zinc	4 Functional mushrooms + Active probiotic
Gut care	None (Ignores the immune system root)	Seals and protects the intestinal lining
Vitality support	Nonexistent (Often drains the body)	Cellular energy recharge (ATP with Cordyceps)

Your path to biological strength

INTELLIGENT STRENGTH EVERY DAY

Soma Fungi

Seal your base. Recharge your energy. Rule your wellness.
